

Presentation and CV Daniel Jinnefält

My name is Daniel Jinnefält.

I was born, in 1967, on the west coast of Sweden. I have a profound interest in health, outdoor activities, culture and literature. I have throughout my adult life been working in various parts of the world and to a major extent within international development, gender, health development, medical trade and water sanitation.

I have since 1995, in my company FairLife been offering consultancy on health and water sanitation plus dealing in international import and export of health products.

In 1999 I entered Lund University completing a Masters of Environmental Science and two Bachelors, in Social and Physical Geography, in 5 years, in Sweden, Australia and Africa, with the intention to understand the social, cultural and financial factors of environmental and food security management on a global basis.

During my studies I was employed as Head of the Lund University Nature Scientific Faculty ambassadors, handling presentation of the University and simultaneously I was involved in political lobbying through student organizations in environment and international development being trusted representative at United Nation meetings.

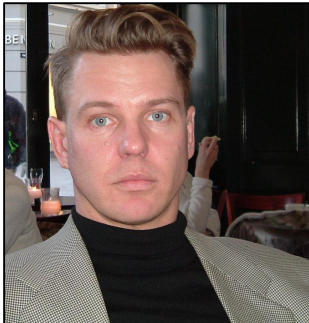

After my studies I was, in 2005, employed working with international development as Project Manager at Scanagri/NIRAS AB, managing SIDA/EU tenders and SIDA projects. This same year I accepted the position as Program Manager in Human Health Development Foundation Zambia leading the work on gender equality, acknowledged by the Equal Opportunities Ombudsman and health development in rural areas, focusing on health development and this work has throughout been mentored and supported by the 1st Lady of Zambia, Mrs. Thandiwe Banda. In 2006 I started SilverMan Manufacturing Ltd and later also Chryoguard Africa Ltd in Kenya extending the work on raising awareness medical health development in Africa.

I am today fully engaged in environmental and health development while the international arena has become a natural part of my life.

Warm regards,
Daniel
